Sign up to online services to:

- Book appointments with a GP
- Request repeat prescriptions
 - Check your symptoms*
- View your medical record

There are two ways to sign up:

Pop in to the practice and show some photographic ID to our friendly reception team (passport or drivers license). You will be given a print out with your username, password and a web address for 'SystemOnline'.

or

Download the 'NHS App' on your smartphone or tablet and follow the instructions to have your identification verified. You will then be issued with a username and password for the app.

On signing up, you will automatically be given access to appointment booking, prescription management and the symptom checker*. You will also be able to view your medical record from the date of your request.

Viewing your previous medical record

You can also request access to your **full patient record**. This may help you to manage your medical conditions and can be accessed from anywhere in the world, should you require medical treatment on holiday. It is important to consider a few things before accessing your medical record - please read the back page of this leaflet for more information.

Accessing another person's medical record

There are times when it may be useful for an individual to have access to a friend or relatives online services, for example if a carer helps a patient with their repeat prescription requests. This is called 'Proxy Access'. You can set this up by speaking with our reception team. The practice will need consent from the patient whose medical record is being accessed in order to process the request.

Patients can also consent for another person to have proxy access to their full patient record online. Ask at reception for a proxy consent form, or download one from our practice website. This should be carefully considered by both parties before a request is made.

Patients have the right to withdraw their consent to proxy access at any time.

Keeping your record secure

Password security

It will be your responsibility to keep your login details safe and secure. If you know or suspect that your record has been accessed by someone that you have not agreed should see it, you should change your password immediately. If you can't do this for any reason, we recommend that you contact the practice so they can remove your online access until you are able to reset your password.

Printing information

If you print out any information from your record it is your responsibility to keep it secure. If you are at all worried about keeping printed copies safe, we recommend that you do not make copies at all.

Things to consider

Forgotten history

There may be something you have forgotten about in your records that you find upsetting.

Abnormal results or bad news

If your GP has given you access to test results or letters, you may see something that you find upsetting. This may occur before you have spoken to your doctor or while the surgery is closed and you cannot contact them.

Coercion

If you think you may be pressured into revealing details from your patient record to someone else against your will, it is best that you do not register for access at this time.

Misunderstood information

Your medical record is designed to be used by clinical professionals to ensure that you receive the best possible care. Some of the information within your medical record may be highly technical, written by specialists and not easily understood. If you require further clarification, please contact the surgery for a clearer explanation.

Information about someone else

If you spot something in the record that is not about you or notice any other errors, please log out of the system immediately and contact the practice as soon as possible.

The practice has the right to remove online access for anyone that doesn't use it responsibly.
